PROFESSIONAL SUMMARY

Data Analyst and Machine Learning enthusiast with hands-on internship experience building real-time, data-driven solutions using Python, SQL, Power BI, and IoT. Skilled in data collection, cleaning, exploratory data analysis (EDA), predictive modeling, and dashboard development. Strong foundation in data visualization, statistical analysis, and end-to-end project delivery. Seeking a Data Analyst / Machine Learning role in Jaipur, Kota, or Ahmedabad to apply analytical and technical skills to real-world business problems.

CORE SKILLS

- Programming Languages: Python, SQL, Java, C, C#, VB.NET, R
- Data Analysis & Machine Learning: Pandas, NumPy, Scikit-learn, EDA, Predictive Modeling, Feature Engineering
- Data Visualization & BI Tools: Power BI, Tableau, Matplotlib, Excel (Advanced), DAX
- Web & Application Development: HTML, CSS, Flask, Streamlit, Android Studio
- Tools & Platforms: GitHub, VS Code, MS Office, Arduino, IoT Sensor Integration, Cloud Storage

WORK EXPERIENCE

Data Analyst Intern — Reve Automation LLP, Gujarat

- Processed and analyzed real-time sensor data to improve data quality for machine learning models
- Developed machine learning models for soil condition prediction and forecasting
- Built interactive Power BI dashboards for real-time monitoring and data-driven insights
- Improved data pipelines and contributed to mobile-based data collection systems

Data Analytics Intern — IBM (via Career Point University) Jun 2024 – Jul 2024

- Performed data analysis, visualization, and business insights generation using Excel and BI tools

Data Science & Machine Learning Intern — Upflairs Pvt. Ltd. Jun 2024 – Aug 2024

- Built machine learning models with data preprocessing, feature engineering, and model evaluation

Machine Learning Intern — The Sparks Foundation Oct 2023 – Nov 2023

- Developed predictive models using supervised learning techniques

Python Programming Intern — CodSoft Nov 2023 – Dec 2023

- Strengthened Python programming, problem-solving, and automation skills

Data Analytics Virtual Experience — Tata Group (Forage) Jan 2026

- Performed exploratory data analysis (EDA) using AI tools to identify data quality issues and risk indicators
- Developed a no-code predictive model framework for customer delinquency risk assessment
- Designed an AI-driven collections strategy using automation and ethical AI principles

KEY PROJECTS

AI-Based Soil Condition Forecasting System

- Built an IoT + Machine Learning system integrating a 7-in-1 soil sensor (moisture, pH, temperature, conductivity) with real-time data pipelines
- Applied ML algorithms to forecast soil fertility trends for precision agriculture; delivered insights via a user-friendly dashboard
- Tech Stack: Python, Machine Learning, Arduino, IoT, Data Visualization, Cloud Storage

Dual-Spectrometer Data Acquisition System

- Developed a VB.NET application with multithreading for simultaneous real-time data capture from dual spectrometers
- Enabled live graph visualization, calibration, and automated data export in XML/CSV formats
- Tech Stack: VB.NET, Multithreading, Data Visualization, XML/CSV

EDUCATION

Bachelor of Computer Applications (BCA) — Career Point University, Kota, Rajasthan 2022 – 2025

- Specialization: Computer Applications & Data Science | CGPA: 8.41 / 10

Senior Secondary (XII), Commerce — Jyoti Kunwar College, Fatehpur, Patna, Bihar 2020 – 2022

Preferred Job Locations: Jaipur, Rajasthan | Kota, Rajasthan | Ahmedabad, Gujarat

DECLARATION

I hereby declare that the details and information given above are complete and true to the best of my knowledge.

Place: Patna Ruchi Singh
